

Aldanis Vigo - Technician

Phone: (254) 394-9926 Email: aldanisvigo@gmail.com LinkedIn: [linkedin.com/in/aldanisvigo](https://www.linkedin.com/in/aldanisvigo)
GitHub: github.com/aldanisvigo

Summary

Electronics and mechanical technician with a strong software development background, hands-on automotive training, and experience troubleshooting connected systems, IoT hardware, Arduino-based electronics, and production applications. Skilled at reading technical information, diagnosing problems, documenting repairs, and improving systems through a mix of practical mechanical aptitude and modern development tools.

Technical Skills

Electrical and Mechanical: Automotive fundamentals, electrical circuits, diagnostics, schematics, wiring, sensors, actuators

Electronics: Arduino, IoT hardware, electronics kits, documentation, component assembly, basic test equipment

Software and Controls: JavaScript, HTML, CSS, Dart, Swift, Java, Kotlin, Node.js, Firebase, MySQL, MongoDB

Frameworks and Tools: React.js, Vue.js, Flutter, WordPress, Git, GitHub, DigitalOcean, Heroku, Dokku

Professional Strengths: Troubleshooting, technical documentation, quality-focused repairs, team communication, leadership

Development Projects

- **OGIV Online** [Play on itch.io](#)
 - Lead developer for a browser-playable online game project published on itch.io.
 - Built and maintained gameplay systems, web deployment flow, and release updates.
- **ACad Circuit CAD Tool** [GitHub](#)
 - Built a C++ schematic viewer/editor for placing resistors, capacitors, coils, transistors, and wires.
 - Implemented grid snapping plus JSON save/load for reusable circuit layouts.
- **Bluetooth LED Controller** [GitHub](#)
 - Created an ATmega328P-based Bluetooth circuit using an HM-10 module, ST7735 display, and LED outputs.
 - Built a Flutter controller app to send commands to the circuit over Bluetooth.
- **Claw Machine V1** [GitHub](#)
 - Designed an ATmega328 microcontroller board with schematic and board previews for a claw machine project.
 - Combined embedded control code with custom board design documentation.
- **QuestGame PIC32 USB and C** [GitHub](#)
 - Built a PIC32 USB CDC quiz-game system with a GTK C host controller application.
 - Integrated I2C LCD backpacks, physical player buttons, and active-low LED game-state indicators.
- **PlayMyHit 2.0**
 - A music sharing platform for the SaucePanTv private Facebook group.
 - Built music submission, comments, reviews, likes, and real-time analytics using Dart, Flutter, Node.js, and Firebase.
- **MathGen** [GitHub](#)
 - Leverages OpenAI's API to help users practice math problems.
 - Built subject/subtopic problem generation with Lottie animations, responsive UI, and graceful HTTP handling.
- **TowPro Application - NDA Protected**
 - An internal dispatching, communications, document storage, and retrieval system.
 - Allows drivers and dispatchers to communicate, share documents, and track tickets in real time.
 - Environment: Vue.js, JavaScript, HTML, CSS, Node.js, Firebase

Professional Experience

- **Flutter Developer | Interapt - Louisville, KY (Remote) | Aug 2023 - Present**
 - My development and maintenance of the SmartHQ application contributed to the app receiving an average rating of 4.7 and 4.3 stars on the Apple Store and Google Play Store respectively.
 - I actively participate in scrum meetings, retrospectives, and sprint planning.
 - I leverage ZenHub, GitHub, AppCenter.ms, and Azure pipelines for efficient collaboration.
- **Software Developer | Dart.Blue - Killeen / Temple / Harker Heights, TX | Jun 2013 - July 2023**
 - I developed the TowPro app, an internal application using Vue.js, Node.js, and Firebase.
 - I worked on IoT projects, combining front-end web applications with Arduino-based hardware for seamless control.
 - I created the SalesRepFinder WordPress Plugin for Morether Creative Agency and Indeco Sales, making it simple for users to search for approved Indeco sales agents in their local areas.
- **Electronics Engineering Technician | GarageLab LLC - Doral, FL | Jun 2014 - Jan 2016**
 - I developed learning materials for the LabDeGaragem.com community, focusing on Arduino platform functionalities.
 - I assembled electronics kits and documentation for subscribers, resulting in increased kit sales.
 - I assisted in translating company documentation from Portuguese to Spanish and English.
- **Infantry | U.S. Army | 2008 - 2011**
 - Operated in disciplined team environments with a strong focus on safety, accountability, and mission readiness.
 - Maintained equipment, followed technical procedures, and performed under time-sensitive field conditions.

Education

- **Basic Automotive Technician Certificate | Central Texas College | Issued 2026**
- **A.S. in Music Production | Full Sail University | Issued Apr 4, 2023**
- **Certification of Completion | Codeup | Sep 2022 - Jan 2023**
 - A 20-week Full-Stack Java Career Accelerator program with 670 hours of expert instruction in software development.
- **A.S. Electronics Engineering Technology | ITT Technical Institute Miami, FL | Jun 2011 - 2013**
 - Completed with Academic Honors. Program exposed students to fundamental skills in electronics and electrical technology.
